Hiring organization
Refplus

Employment Type
Full-time

Beginning of employment
2025

Industry
Commercial and Industrial Refrigeration Equipment

Job Location
South shore of Montreal

Working Hours
37.5

Description

Reporting to the Production Supervisor, the press operator is responsible for transforming raw materials into finished parts of exceptional quality, ensuring attention to every detail and compliance with technical specifications.

Responsibilities

Specifically, and with a team-oriented and collaborative approach—and without limitation to additional tasks that may arise to achieve organizational and quality department goals—the press operator will be responsible for the following tasks:

- Operate press brakes
- Perform programming and produce parts according to drawings and specifications
- Read 3D plans
- Understand alarms and troubleshoot issues

Qualifications

Desired Profile:

- Good dexterity
- Ability to read blueprints
- Knowledge of metrology
- Experience with punch presses and/or press brakes
- Versatile, autonomous, and responsible
- Experience with overhead cranes (an asset)
- DEP in precision sheet metal work (an asset)

Required Skills:

- Proven experience operating press brakes, preferably in an industrial setting
- Experience working with various types of metals such as steel, aluminum, stainless steel, etc.
- Ability to read and understand technical drawings and specifications

- Proficiency with metal-specific measuring tools to verify part dimensions and tolerances
- Problem-solving skills and the ability to work independently
- Specialized training in press brake operation for metal (an asset)
